### **Healing the Healthy Way – From Himalayan Farms to Your Daily Life**

PARVYUKT is India's first vertically integrated medicinal mushroom wellness platform, bringing together proprietary cultivation, premium extracts, nutraceuticals, functional foods and healing personal care into one evidence-led ecosystem for preventive health.

Recognised by DPIIT, acknowledged by BIRAC & TDB, supported by IIT and the Ministry of Agriculture's AIF, PARVYUKT is building a credible bridge between traditional wisdom and modern science for people who want natural, traceable and trustworthy wellness solutions.

## **Who we are**

Pervyukt Agrinnovaters (PARVYUKT) is a purpose-driven preventive healthcare Agri-innovation company founded in 2021.

We focus on "skin-to-stomach" solutions that start at the farm and culminate in high-value wellness products, pioneering integrated specialty medicinal mushroom cultivation and allied Agri-activities with a strong emphasis on biotechnology-driven research and premium personal care, nutraceutical and food-and-beverage offerings.

Guided by the philosophy "**Healing The Healthy Way**", PARVYUKT exists to help people move from chronic lifestyle stress and deficiencies towards sustainable, nature-aligned wellbeing.

## **Vision and mission**

Our **vision** is to:

"Innovate, provide, and inspire every human to find happiness through natural healing."

Our **mission** is to:

“Innovate and create sustainable skin-to-stomach preventive healthcare solutions, grow and supply nutrition globally, and foster better quality of life for our farmers, consumers and colleagues around the world.”

These statements reflect our commitment to inclusion, sustainability, innovation, integrity and disciplined, long-term thinking.

## **Why medicinal mushrooms**

For centuries, fungi have been revered in folk medicine for their powerful health benefits. Today, medicinal mushrooms are emerging as one of the most credible bridges between traditional wisdom and evidence-based wellness, especially for immunity, inflammation, cognition and healthy ageing.

Leading varieties like **Turkey Tail** and **Lion’s Mane** are associated with immune support, inflammation modulation, brain health and healthy ageing, backed by growing global clinical and translational research.

According to market research, the global functional mushroom market was valued at **USD 31.4 billion in 2024** and is projected to reach **USD 83.6 billion by 2033**, with an expected CAGR of **11.5%** and Asia-Pacific as the leading growth region – yet consumers still struggle with low trust, uneven sourcing and inconsistent quality.

This is why PARVYUKT focuses exclusively on **high-value functional mushrooms** and a science-anchored, integrated platform instead of a broad “everything wellness” story.

## **Our integrated wellness platform**

PARVYUKT is building a vertically integrated medicinal mushroom platform that starts with **controlled cultivation** and moves up the value chain into **premium branded natural healing products**.

- **Proprietary low-cost cropping-room designs** and unique Indian strains of Turkey Tail and Lion's Mane enable consistent quality, traceability and viable unit economics.
- **Value-added formulations** include extracts, tinctures, nutraceutical formats, functional foods and healing-centric personal care, sequenced in phases rather than launched all at once.

By combining cultivation control, ingredient development and premium brand-building under one roof, PARVYUKT addresses a fragmented, low-trust category with a unified, education-driven wellness stack that consumers can understand and rely on.

### **Science, technology and standards**

Our biotechnology and nano-technology-based MDEN research focuses on achieving **substantially higher beta-glucan content** and enhanced bioactive potency in proprietary strains of Turkey Tail and Lion's Mane.

Early lab work at IIT and partnering institutions has shown **encouraging signals** around anti-cancer and neuroprotective potential in controlled cell-line studies, which are being evaluated and validated further under scientific supervision.

PARVYUKT operates with a strict **compliance-first discipline**. A distinguished scientific and advisory board spanning cancer research, experimental therapeutics, neuroscience, biotechnology, rural development and women's empowerment provide continuous guidance and oversight.

We are committed to making only **responsible, regulation-aligned claims**; commercial products are positioned as supportive wellness offerings, not as medical treatments.

## Rural impact and Himalayan bio-resources

Rooted in India's agricultural heartland, PARVYUKT is designed to foster preventive healthcare from the grassroots by transforming farming livelihoods and local bio-resources into high-value wellness platforms.

Our operating model links women farmers in the hilly regions of Uttarakhand to an **alternative, high-value crop** through spawn-to-shelf value-chain upskilling, renewable-energy-based cropping-room designs and resilient rural development pathways.

Under its flagship brand **PESHAGI**, PARVYUKT has also developed a 100% natural premium personal-care range built around Himalayan Seabuckthorn –extending the same science-anchored, AYUSH-aligned approach to broader Himalayan bio-resources while keeping medicinal mushrooms as the core spine.

## Who we serve

PARVYUKT's integrated platform is designed for:

- **Health-conscious consumers** seeking natural, evidence-led support for daily preventive health.
- **Practitioners and wellness centres** looking for traceable, science-backed ingredients and products.
- **Strategic partners and institutions** who want to co-create responsible, premium wellness offerings rooted in India's bio-resources.

## Founder and leadership edge

Founder, MD & CEO **Rrahul Dalmia** brings over two decades of international experience across Wall Street finance, strategy consulting at Microsoft, media with Doordarshan and health-tech entrepreneurship, combined with a decade-long focus on deep medicinal mushroom research.

This founder-market fit enables PARVYUKT to blend operating ambition with category education, capital awareness, premium positioning and strategic partnership-building in a high-potential wellness space.

### **Invitation to partners and collaborators**

PARVYUKT is seeking strategic partnerships that bring **more than just capital** – including distribution strength, manufacturing leverage, category-building experience and institutional reach.

In alignment with national AYUSH frameworks such as **AYURGYAN, Ayurswasthya, IEC and the Ayush Anudan Portal**, we are actively exploring collaboration pathways for research validation, standardization, wellness pilots and responsible public-health category education.

Take a step towards a partnership that embodies healing and progress: connect with PARVYUKT – a name synonymous with health, innovation and social benefit – and help shape the future of evidence-led medicinal mushroom and Himalayan wellness from India to the world.

---

---

PARVYUKT means ‘full of festivities’ – a joyful union of cultures, traditions and contributions that shape who you are.

### **Meaning of PARVYUKT**

Rooted in the ancient Dev Bhasha Sanskrit, “**Parv / Perv**” signifies *festival* and “**Yukt**” means *full of*, making PARVYUKT a yogic expression of immense festivities and joy arising from the coming together of diverse cultures and their traditions. It reflects a celebratory, elevated way of living where wellness, nature, and human potential converge into a continuous festival of growth and healing.

### **Deeper inspiration**

PARVYUKT also draws inspiration from the union of two archetypes from the Mahabharata: Krishna, the supreme strategist (Avyukt), and Arjun, the devoted implementer (a.k.a Parth). Together, they symbolise clear vision and decisive action—exactly the balance PARVYUKT seeks to embody in building evidence-led, nature-aligned preventive healthcare for modern life.
